-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- A) Claims 1-32, drawn to a method, apparatus and computer readable medium for determining a valid destination address classified in class 709, subclass 245.
 - B) Claims 33-43, drawn to a method and computer readable medium for determining a carrier type based on a requested address associated with destination party classified in class 709, subclass 224.
 - C) Claims 44-49, drawn to a method for automatically determining a proper destination address based on a requested address classified in class 711, subclass 202.
 - D) Claims 50-54, drawn to a method for developing a universal address-recognition database classified in class 707, subclass 102.
-

The inventions are distinct from each other for the following reasons:

Inventions A, B, C, and D, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention A has separate utility for determining a valid destination address, which is separately usable with or

Art Unit: 2151

without invention B, which has utility for monitoring a request associated with a destination address, which is separately usable with or without invention C, which has utility for translating a request to determine a proper destination address, which is separately usable with or without invention D, which has utility for developing an address-recognition database. See § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
